The Designer Behind the Work

Vollmann Olamide Akarakiri is a multidisciplinary design professional specialising in interior design, space planning, and 3D visualisation. With 5+ years in the built environment, he brings architectural rigour and creative vision to every interior — from intimate residential spaces to large corporate fit-outs.

He has delivered interior design solutions for residential living rooms, dining areas, bathroom suites, executive boardrooms, and corporate conference spaces — coordinating materials, finishes, furniture layouts, and lighting to create harmonious environments that serve both aesthetics and function.

Backed by a strong BIM and construction background, Vollmann's designs are buildable, coordinated, and delivered on time — bridging the gap between concept render and physical reality.

Design Software & Tools

Industry-leading tools applied across every stage of the interior design process — from concept sketch to photorealistic render.

Autodesk Revit

Expert — BIM Interior Modelling

Fully coordinated interior BIM models with furniture families, material assignments, room schedules and documentation sheets for handover.

Lumion & Qmotion

Advanced — Photorealistic Rendering

High-fidelity interior renders and walkthroughs communicating lighting, material quality and spatial atmosphere to clients and stakeholders.

AutoCAD

Expert — Technical Drawings

Detailed floor plans, reflected ceiling plans, elevation drawings and joinery details — construction-ready documentation packages.

SketchUp

Proficient — Concept Modelling

Rapid 3D massing and concept modelling for early-stage client presentations and design development workshops.

Microsoft Office Suite

Advanced — Project Reporting

Design briefs, material schedules, procurement lists, cost estimates and progress reports for clients and project teams.

Navisworks

Proficient — Coordination

Multi-discipline model coordination and clash detection to ensure interior fit-out works align with structural and MEP systems.

Residential Interiors

Corporate Fit-Outs

Interior Design Expertise

End-to-end interior design services — from client brief and concept to detailed drawings and fit-out oversight.

Residential Interiors

Living rooms, dining areas, bedrooms, kitchens and bathrooms — complete home interior packages tailored to each client's lifestyle, preferences and budget.

LIVING · DINING · BEDROOMS

Corporate & Office Spaces

Executive boardrooms, conference rooms, open-plan offices and reception areas — environments designed for productivity, brand identity and professional impact.

BOARDROOMS · CONFERENCE · OFFICES

3D Visualisation

Photorealistic renders and walkthroughs that communicate design intent with clarity — helping clients visualise and approve designs before construction begins.

RENDERS · WALKTHROUGHS · PRESENTATIONS

Material & Finish Specification

Comprehensive material schedules covering flooring, wall finishes, ceiling treatments, fixtures, fittings and bespoke joinery — fully coordinated for procurement.

MATERIALS · FINISHES · SCHEDULES

Kitchen & Joinery Design

Bespoke kitchen layouts, cabinetry design, island configuration and storage solutions — designed and documented for manufacture and installation.

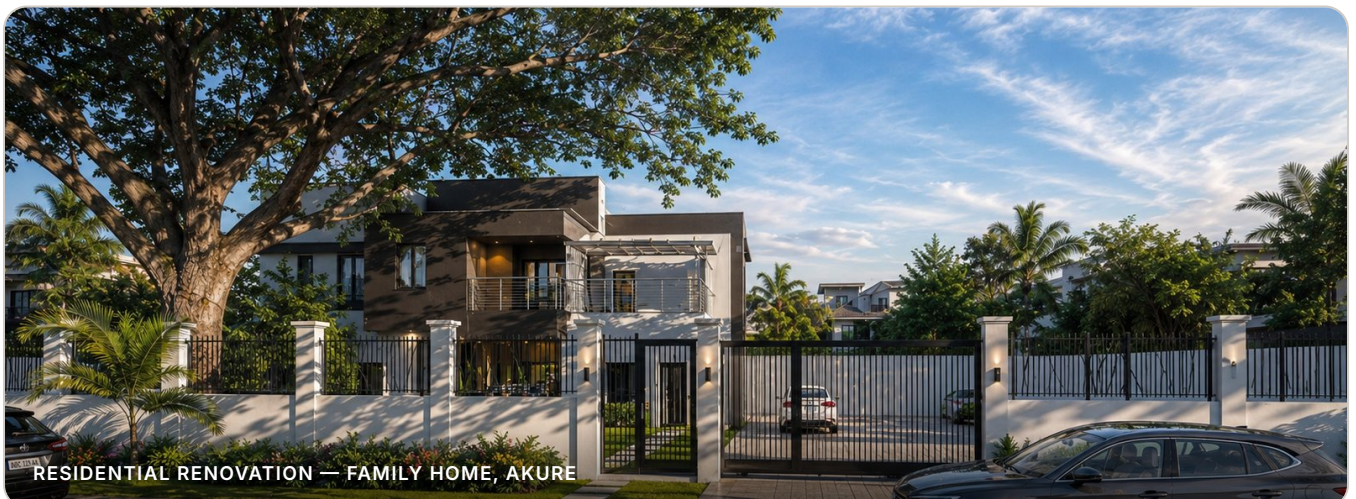

KITCHENS · CABINETRY · BESPOKE

Fit-Out Project Management

End-to-end fit-out coordination — contractor management, quality control, procurement oversight and programme management from design through handover.

FIT-OUT · DELIVERY · HANDOVER

RESIDENTIAL RENOVATION — FAMILY HOME, AKURE

Ikeja Conference Room Design

A contemporary conference and meeting space — Ikeja, Lagos. Space planning, material specification and full 3D visualisation package.
